

1. Open Google Chrome (not Safari).
2. Open my wikispace in a tab and click on the link to the method on how to migrate your Drive folder.
3. In a new tab, create a new Gmail account unless you have one already.
4. In your old Google account (psdmail account), create a folder and put in it everything you want to copy (you can drag & drop folders and files inside this folder directly)
5. Share this folder with your new Google Account (read or edit access, doesn't matter).
5. Copy the URL of this folder.

6. Log into your new Google account.
7. Open [the app](#) with your new account and paste the URL of the folder, then press start
